

Current and proposed traffic flows in Passenger Car Units (PCUs)

Key				
No noticeable change to total traffic flow (less than 1 vehicle per minute predicted)				
Reduction in total traffic flow (more than 1 vehicle per minute predicted)				
Minor increase in total traffic flow (1-2 vehicles per minute)				
Noticeable increase in total traffic flow (above 2 vehicles per minute)

	Gloucester Place	Upper Montagu Street		

This traffic flow change assessment is developed from the outputs of strategic traffic modelling. The assessment presented here highlights changes from the existing total traffic flow on a street that are considered to be greater than the accepted margin of error for this type of traffic modelling.
