1. Executive Summary

NHS Central London and West London Clinical Commissioning Group (CCG) is commencing the service review, re-design and procurement of 9 and 6 respectively end-to-end Planned Care Services in 2014/5. This paper reports on the methodology we are using to achieve our aims to improve healthcare outcomes for patients as well as achieve better value for money. Due to West London CCG's population, including Kensington and Chelsea and Queens Park Paddington and the close relationship to Central London's population, this paper also outlines some of the joint work being undertaken by the two CCG's.

2. Key Matters for the Committee's Consideration

To note the procurement plans for Planned Care Services across Central and West London (as detailed in Appendix 1)

To note the development of the CCG's joint procurement approach as part of the Tri-borough strategic objectives (as detailed in Appendix 1)

3. Background

N/A

4. Health and Wellbeing Implications

- Whole systems integrated care
- Continuous improvement in service quality
- Treatment in appropriate location
- Reduced length of hospital stay
- Care closer to home
- Patient choice
