

## APPENDIX B – OPTION APPRAISAL

Option appraisal should be structured around the following questions:

Key questions	Issues to consider
How is the proposal to be funded in terms of initial and ongoing costs?	<p>Is there an existing budget or is virement required?</p> <p>Does the proposal provide any added value to the Council in terms of improved efficiency, budget savings or reduced costs?</p>
What is the opportunity cost of using up these cash resources?	<p>What is the expected length of the investment period?</p> <p>What additional costs are there (transaction costs, due diligence etc.) in addition to the capital investment itself?</p> <p>Does the expenditure count as a capital transaction under capital accounting regulations? If so what are MRP/CFR implications?*</p> <p>Is there an exit strategy? Will this involve additional costs?</p> <p>Is there a risk of permanent impairment in the capital value of the investment?</p>
Does the proposal link to corporate objectives and statutory services?	<p>If so how does it compare to the cost of achieving similar outcomes?</p> <p>Will this delivery option increase or decrease outcome or cost risk?</p>
Is the proposal solely to generate income?	<p>What key assumptions and sensitivities are contained in the financial model? *</p> <p>What are best, worst and medium case scenarios?</p> <p>How do these compare to other investment opportunities within the same investment allocation?</p>
What transaction, professional and management costs need to be considered?	<p>Consider for example:</p> <p>Independent advice and “experts”</p> <p>Legal fees/stamp duty</p> <p>Tax, audit, accountancy, secretarial</p> <p>Officer time in attending meetings etc.</p>

\* To promote consistency when evaluating potential investments, any MRP requirement for property or alternative investments will be calculated using a straight-line basis with the option for an annuity basis where appropriate.
